Another stellar headliner of our 2005 offering will be this young, proven daughter of GAR Precision 1680. Her three natural calves balance a birth ratio of 98, weaning ratio of 104, yearling ratio of 101, IMF ratio of 109, REA ratio of 103, and ribfat ratio of 84. Three flushes to date have averaged 7 transferable embryos per flush. Her first son, SydGen 1407 Corona 2016, hit the sire summary with his first progeny scanned earning him ultrasound EPDs of .71 and .78 for IMF and UREA, and a \$B Value of +58.81, third highest on the young sire summary, as well as big positives for CED, SC, and \$W. Corona's first few sons were the hit of our 2004 sale, and we're expecting great things in the future on this top young sire co-owned with the Mike Kasten Beef Alliance and Snake Creek Ranch.

SydGen

SYDGEN 1407 CORONA 2016

Named Reserve Grand Champion Bull of the Missouri State Fair as a yearling, this powerful Future Direction son offers a rare combination of maternal, carcass value, and phenotypic strength. His dam, SAF Forever Lady 0182, was in the \$62,000 buyer's choice lot in our 2002 sale, was flushed in partnership with Three Trees Ranch, and records three natural progeny weaned at 115 ratio with one yearling at 115. Thirteen progeny scanned record average ratios of 104 for IMF and 102 for UREA. We'll offer half interest and half possession in OnStar, along with five maternal brothers by SydGen On The Mark, E161, and High Prime, and one maternal sister by High Prime. A flush sister to OnStar is also currently serving in our donor pen.

He sells!
