

# From our Herd to Yours . . .

## Big Spread Big Scrotal

### Top 2% \$W • Top 5% \$B

DIRECTIVE was our most popular bull for semen sales last year, and his proof has continued to come in strong. He was the \$25,000 top-selling bull in our 2001 sale to Big Dry Angus Ranch, Jordan, MT. No sire on the Spring 2005 Sire Summary can match his combination of BW, WW, SC, and %IMF EPDs.

Cattlemen appreciate the extra body length, performance, and scrotal development in his sons, and 14 direct sons through the last two SydGen sales have averaged \$4,993. His daughters in production are very similar to his famous natural dam, SAF Royal Queen 5084, and will ensure his popularity for years to come. 5084 has produced \$427,783 of direct progeny sales for us, and fourteen sons are being utilized in our program to lock in her curve-bending, high scrotal genetics.

Calved: 1-4-2002 • 14106303

S: Bon View New Design 1407 • MGS: GAR Precision 1680  
Of the 81 proven sons of 1407 on the current sire summaries, Corona is the #1 \$B sire, and his first 13 progeny now scanned at average ratios of 118 for IMF, 105 for REA, and below 100 for both fat readings indicate he could get even stronger. Several cowmen have proclaimed him to have the best hip and natural thickness of any 1407 son they have seen. Our first five sons averaged \$5431 at 10 months of age. He's the bull to go to for supreme carcass quality with excellent growth, and calving ease still in the top third of the breed.

We also have our first calves on the ground by another promising 1407 son, the OBI top-indexer Spur Success 2801, and the calving ease looks excellent.

Calved: 1-27-99 • 13333906

S: SAF Focus of ER • D: SAF Royal Queen 5084  
Another top, proven son of 5084. 9095 is the only proven sire in the Angus breed that ranks in the top 1% for CED, CEM, and \$W while maintaining a \$B index in the top 15%. Designed and priced for breeding commercial heifers where replacement females and high-performing steer mates are desired.

His flush brother, SAF Focus J30, is the highest proven marbling son of 5084, and also carries excellent values for CED, CEM, \$W, and \$B. Compare these sires to any in the breed; they are a logical choice for your heifers.

For more information on any of these sires, call us for an ORigen semen directory, or visit our Web site at [www.sydgen.com](http://www.sydgen.com)
