

Adaptable Genetic Diversity Will Be Available on November 22...

Coming to us as a bred heifer from Basin Angus Ranch, Hobson, MT, M017 is the epitome of the \$W index where she ranks in the top 150 proven dams of the Angus breed. Though obviously not the most beautiful cow on the farm, this Pathfinder® female has proven herself well, one calf at a time. Her first natural son brought \$4,000 to longtime customer S&S Seed Farms, Rocheport, MO, and has been brought back into our program as a natural service sire. One daughter released is working in the F1 seedstock program of another longtime customer, Alford Cattle Co., Caldwell, TX, and another son brought \$7,000 to Angus breeder Brian Hunt of Braymer, MO.

Her Spur Success two-year-old daughter has one of the most exciting January bull calves in our current calf crop by Gardens Prime Star, and her yearling daughter is in the replacement pen.

M017's production record is 5 BR-97, 5 WR-113, 4 YR-110, 4 IMF-109, and 4 REA-116. She ranks in the lowest 25% of proven dams for Mature Weight EPD and the lowest 10% for Mature Height EPD, earning her high marks for efficiency as well as production. She is currently nursing a heifer calf by SVF Hi Road, and her first embryo progeny were born in January. She will sell bred to the proven high performance sire Spur Success 2801.

Basin Lady M017
