SydGen Exceed 3223

pictured on May 29, 2022, about to wrap up his 16th natural service breeding season.

Of all high-accuracy Angus sires (.85 for YW and .65 for CW), Exceed is the Number 1 sire for \$B and \$C, Number 3 for Marbling EPD, and in the top 50 for Docility EPD, along with SydGen Enhance, SydGen CC&7, SydGen Liberty GA 8627, Connealy Cool 39L, SydGen Trust 6228 and Connealy Forward. (Of these high-use sires, ranked on the \$Combination index, SydGen Enhance is Number 3, SydGen Black Pearl 2006 is Number 6 and SydGen FATE 2800 is Number 7.)

Of all Angus sires born in 2013 or earlier that are listed on the Sire Summary, he is the Number 2 \$Combination sire, the Number 2 \$Beef sire, the Number 10 Marbling sire and the Number 12 Docility sire.

(Of these older sires that have stood the test of time, SydGen Black Pearl 2006, SydGen Blacksmith 4010, SydGen FATE 2800 and SydGen Atlas 1043 also rank in the top 22 for \$C.)

As of this writing, the Number 1 non-parent bull in the breed for Marbling is out of an Exceed daughter. In March, we had 6

yearling females scan over 12% IMF, highest in our history, and the four highest IMF scans were daughters and granddaughters of Exceed. The best combination ultrasound scan ever at SydGen on a yearling bull was sired by Exceed. The highest-selling female ever at SydGen was sired by Exceed. The Reserve Grand Champion Carcass steer at the 2021 NJAS was sired by Exceed. He sired the top ADG and best feed efficiency steer in the 2021 MCA Profitability Challenge. The largest one-day semen collection record at ORigen at their 40 Million cell standard is held by his son Enhance, breaking the previous record held by Exceed himself.

We hear a lot about how the older sires can't keep up in today's fast-paced genomic world. We also hear that we need to pay more attention to longevity, fertility and efficiency.

Exceed and his sons Enhance, Merit, Transcend and Bonus offer a unique perspective.
