Wormed with Synanthic & Ivermectin

OPERATIONAL HISTORY

Mershon Cattle is a commercial cattle operation run by the Mershon family in Jackson County, Missouri. This is the ninth consecutive year that our bred heifers are offered at the Sydenstricker Influence Bred Heifer Sale. Mershon Cattle has used Sydgen bulls and semen since 2004. The herd consists of Angus based, cross-bred cows that have been AI bred using Hereford, Simmental and Charolais semen. Steers are retained and sold on the grid.
