“100% of the bred heifers we bought from Mershon Cattle bred back. And, they calved completely unassisted. They are doing great ad maintained their body condition. We are extremely satisfied and will buy from them again!”

Spring 2024 Kentucky Customer

Heifer Pairs Information

Approximately 34 fall heifer pairs to sell immediately following bred heifers. Most are black Angus-cross with a couple of Black Baldy heifers. All with calf at side. Calves' tags match their mother's tags. Calves are sired from SydGen Angus bulls and are 30-60 days old. Calves vaccinated with Naselgen 3 PMH and given shot of Draxxin prior to the sale.

About Us

Mershon Cattle is a commercial cattle operation run by the Mershon family in Jackson County, Missouri. This is the 10th consecutive year that our bred heifers have been offered at the SydGen Bred Heifer Sale. Our focus on quality genetics has helped us produce a high-performing herd. Replacement heifers will have a moderate frame size with strong maternal traits, calving ease and high docility. We have used SydGen bulls and semen since 2004. The herd consists of Angus based, cross-bred cows that have been AI bred using Hereford, Simmental and Charolais semen. Steers are retained and sold on the grid.
